Bug Report

Bug ID	BUG_001
Bug Title	Profile Picture Upload Failure
Reported By	Savini Anuradha
Date	2024-9-18
Environment	Browser: Chrome (v90), OS: Windows 10, Application Version: v1.0.0
Severity	High
Priority	Medium
Description	The user encounters an error when trying to upload a profile picture. The upload fails for images larger than 2MB, and for images in unsupported formats (e.g., .bmp, .tiff).
Steps to Reproduce	1. Navigate to the user profile page. 2. Click on "Upload Profile Picture". 3. Select a .bmp file or an image larger than 2MB. 4. Click "Submit".
Expected Result	The image should upload successfully if it meets size and format requirements. For unsupported formats or oversized files, appropriate error messages should appear.
Actual Result	No error message is shown. The upload fails silently, and the user remains on the profile page without any confirmation or feedback.
Attachments	Screenshot of the failed upload
Status	Open
Assigned To	Mr. Deshan
Remarks	User should be notified of the size/format restrictions before attempting to upload. Validation should be improved to handle such cases.
